

Advanced and Daily Progress Reporting (DPR)

Ensure transparency and compliance and reduce downtime with advanced digital reporting.

Generate and digitally send customizable reports to stakeholders in minutes. Easily monitor progress and efficiencies of assets and personnel with comprehensive and customizable data oversight.

Create and automate efficient workflows

Integrate with existing databases to automate tasks & reduce time spent recording, managing and preparing data analyses, reports and documentation.

Increase Project Transparency

Facilitate cooperation and accountability across projects and personnel with customizable, interactive & analytical dashboards.

Ensure optimal data quality

Improve the quality and consistency of your data with intelligent data recording and validation.

Offline and low-bandwidth access

System browser caching minimizes internet usage and captures offline input.

Informed decision making

Make fact-based decisions and accurately forecast future progress with on-demand, real-time operational data analytics.

Built-in Flexibility

Adapt to any work or project scope & contractual setup, and schedule repetitive activities, such as surveys, wind power projects, and PV projects.

All of Shoreline's solutions integrate within your existing IT landscape.

Increase in-field mobility and boost productivity.

Keep customer, resource and project data updated and available at all times and under any conditions.

Key solution features

01

Automated DPR data collection

Automate and add site sensor data and time registrations via system integrations or auto-populate via mobile app.

02

Digital signatures

Eliminate tedious sending, printing, signing, scanning, and uploading with easy, safe & secure digital signatures.

03

Consolidated data & reduced data loss

Continuously monitor asset and personnel progress, cost, production, effectiveness, and more.

04

Simplifies data handling

Easily create and share customized reports and business cases with stakeholders, clients and colleagues.

05

Customizable dashboards

Filter views to focus on desired data & outputs in one fully customizable dashboard.

06

Collaborative workspace

Centralized data enables colleagues across teams and outside clients/contractors to work collaboratively.

- ✓ Work orders & sequences
