

Marine Coordination

Gain the critical data insights necessary to maximize vessel capacity and deployment, reduce fuel and resource

Coordinate complex vessel, dispatch management, site overview, and personnel tracking in one unified interface.

Track and optimize vessel and personnel performance

Generate actionable insights to reduce downtime and automate processes across the entire lifecycle and realize cost savings of up to \$300K per day.

Increase production and availability and reduce errors

Vastly reduce manual input and costly human error by leveraging the power of automation to generate work orders, assign personnel and manage resources.

Achieve safer and more responsive operations

Identify, report and resolve potential hazards, and implement, ensure safety guideline distribution, and create certification compliance audit trails.

Streamline reporting and compliance measures

Increase reporting turnaround and improve transfer manifesting, with on-demand, data-rich DPR, timeline, KPI and other report and analytics generation in any format.

Plan and schedule optimally under any condition

Save up to 10% OPEX by optimizing scheduling, re-planning, dispatching and deployment with real-time complex field service scenario visualizations.

Gain actionable personnel and vessel insights

Gain the crucial data-based insights you need to reduce fuel consumption and increase worker productivity and availability.

Ensure safe and efficient offshore operations with versatile marine management software

Gain a complete, real-time overview of all your assets even with limited internet connectivity. Save time and increase productivity with automated DPRs, and optimize personnel management with GDPR-compliant personal availability, rotation & certificate detail handling.

All of Shoreline's solutions integrate within your existing IT landscape.

Key solution features

01

Live weather & vessel data

Reduce downtime & increase safety & compliance with real-time weather, personnel, and vessel tracking.

02

Automated authorization work flows

Create, automate and certify efficient work and asset custody authorization adherence protocols.

03

APIs & 3rd party integrations

Unite data, & eliminate countless interfaces, local storage & scattered files with secure integration

04

Data-rich, customizable dashboard reporting

Easily analyze, segment, and share large amounts of data with integrated dashboard functions.

05

Permit to work & RAMS

Create, approve, reject and configure permits to comply with pre-determined RAM and LOTO work timelines.

06

Customizable personnel management

Walk personnel through risks & procedural protocols prior to site arrival and ensure certification compliance.

- ✓ Personnel and logistic profiles
- ✓ Team management
- ✓ Location registration
- ✓ Skill & certification management
- ✓ Work permits
- ✓ Mobile in-field app

- ✓ Log out - tag out
- ✓ Historic & forecast weather data
- ✓ Transfer manifesting
- ✓ Short-mid term planning
- ✓ Wind farm layout

- ✓ Location tracking
- ✓ Emergency response limits
- ✓ Exclusion zone breaches
- ✓ Progress and status monitoring
- ✓ Site information panel
