**Ex** Execution

Resource Management & Planning

Increase project speed and profitability with intelligent resource and scheduling insights.

Meet more project deadlines and reduce errors by identifying and resolving bottlenecks and maximizing resource and equipment utilization.

Improve cross-project and team communications and collaboration.

Bolster transparency and increase collaboration with clients and management via digital reporting.

Increase production time with key data insights

Analyze progress, utilization, and early production data and identify and report the root cause of production losses.

Reduce equipment downtime with smart tracking

Track, plan, record and stay current with inspections and downtime on cranes, vehicles and other large equipment.

Meet project deadlines with insightful change response functions.

Quickly reschedule resources and adjust work plans in response to last minute schedule changes or adverse events.

Speed up task turnaround and reduce errors

Generate and approve the most optimal draft plan — even under last-minute conditions — and dispatch to technicians and stakeholders.

Save time with comprehensive process optimization

Monitor certificate validity, track availability, manage schedules, and rotations. Receive qualified personnel sub alerts under last-minute or change conditions.

Accurately plan, schedule, and track your projects
with one resource management platform

Compare project estimates with actual data and build more efficient teams.

**All of Shoreline's solutions
integrate within your
existing IT landscape.**

Key solution features

01

Advanced scheduling

Generate useful gap analyses and task
based personnel recommendations
and stay up-to-date on qualifications
and training progress.

02

Data-based project estimating

Scheduling algorithm identifies and
categorizes available resources
by prioritizing those with the
highest match.

03

Cross-team communications

Facilitate dynamic communication
between stakeholders from
any location.

04

Automated authorization
workflows

Create, automate and certify efficient
work and asset custody authorization
adherence protocols.

05

Maximized resource and
scheduling utilization

Schedule personnel, vessel, transport,
and crane work with minimal
manual input and generate optimal
schedules even under last-minute
or change conditions.

06

Real-time, complete user
location and data views

Fully customizable dashboards
highlight the most important data
for each user at any given time.

✓ Personnel and logistic profiles	✓ My schedule mobile app view	✓ Transfer manifesting
✓ Team management	✓ Log out - tag out	✓ Short-mid term planning
✓ Location registration	✓ Time reporting	✓ Long term planning
